

**STUDENTS**Students and Telecommunication Devices

The board of directors recognizes the importance of technology in providing quality education and opportunities for students. The board believes that access to technology resources and the skills students develop play an important part in the learning process and the success of students in the future.

The superintendent will develop procedures that include personal mobile devices in the form of Responsible Use Compacts that encourage student use of technology and the school district's computer networks, while establishing reasonable controls for its lawful, efficient and appropriate use.

To help ensure student safety and citizenship in appropriate, ethical online activities, students will be educated about appropriate online behavior, including interacting with other individuals on social networking websites and in chat rooms, and cyberbullying awareness and response.
