Vision 2027 Data Process

Reaching Vision 2027 requires us to regularly capture and analyze data to track our progress and make adjustments. At the board level, we look at the following student data and perception data to determine if we are headed in the right direction. When we see an area that needs attention, we will look closer to determine if there is a particular school, grade level, or subject that requires additional support.

Student Outcome Data Linked Here

- **Attendance**
  - % of students who, on average, have fewer than two absences per month
- **Math, Literacy & Science**
  - Performance: % of students who meet or exceed standards in grades 3-10 on the state assessments
  - Progress: % of students who have high growth on the state assessment
- **Graduation**
  - % of ninth-graders on track
  - % of students who graduated in four years
- **Post-Graduation Metrics**
  - Enrollment: % of students enrolled in a two or four-year program after their first year
  - Persistence:
