

# GOOSEBERRIES

Gooseberries can be shades of green, pink-orange or purple

They are grown in New Zealand, Northern Europe and North America

The sweetest gooseberries are going to be the pink-orange or purple colors!

They can be smooth or fuzzy, and opaque or translucent

These berries are full of vitamin C and fiber

They grow on shrubs that can grow up to 6 feet tall

There are different types of gooseberries - Cape and Chinese gooseberries

Cape gooseberries are pink-orange

When you eat a cape gooseberry you have to peel back its "cape"!
