

Honeycrisp Apples

Fun Facts

IN THE HISTORY OF THE APPLE INDUSTRY, THE HONEYCRISP VARIETY IS A "NEW KID" ON THE BLOCK. IT WAS CREATED RIGHT HERE IN THE UNITED STATES AT THE UNIVERSITY OF MICHIGAN, TWIN CITIES IN 1991! EXACT PARENTS OF THE APPLE ARE UNKNOWN BUT THE APPLE IS LINKED TO THE MANCOUN AND HONEYGOLD ORIGINS. THESE APPLES HAVE LARGER "CELLS" THAN ANY OTHER VARIETY OF APPLES, THESE CELLS HOLD IN THE FRUIT'S NATURAL JUICES AND WHEN RUPTURED, IT MAKES FOR A JUICIER BITE THAN ANY OTHER APPLE! A WINNING ALL-PURPOSE APPLE, THE HONEYCRISP OFFERS A PLEASINGLY CRISP SWEET-TART BITE, BUT THEY ARE NOT LIMITED TO OUT-OF-HAND EATING. THESE APPLES ALSO ADD INCREDIBLE FLAVOR TO ANY RECIPE!

Can you
find your
way
through
the apple's
core?
