

# Lemon Plums

## FUN FACTS

Lemon Plums are the newest addition to the Stonefruit market!

This combination of Lemons and Plums is a hybrid variety that starts off a yellow color and ripen into reddish -orange tinted hue. Lemon plums are heirloom shaped and like other Stonefruit, have a pit in the middle. These gems are imported from Chile and are only available for a few weeks out of the year, usually around the month of February. Lemon Plums have the texture of a plum but a sweet, citrus flavoring to make for a yummy snack!
