

# Red Grapes

Did you know...

- There are over 8,000 varieties of grapes around the world
- There are many different colored grapes, but the most common are green and red
- Grapes are 80 percent water content
- Roughly 72 million tons of grapes are produced around the world every year
- 98% of grapes grown in the US come out of California
- A grape vine can grow up to 50 feet long

Help the grape find the way through!

Color me!
